

I have been a subscriber to XM satellite radio for 6 months and I choose to pay for this service because it provides me with the best entertainment and news sources possible. The new offering of weather and traffic service only enhances it further and makes my subscription to the service all that more valuable to me and my family. The variety and quality are not available from any of the other radio stations in this area. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Please reject the NAB's petition 04-160.
